Information Disclosure Statement

The information disclosure statement filed on 2/01/2007 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claim 13 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claimed "encoded audio signal" is non statutory because it doesn't fall within any of the categories of patentable subject matter set forth in 101.

Allowable Subject Matter

Claims 1-12 allowed.

The following is a statement of reasons for the indication of allowable subject matter: the claimed invention is related to a method and apparatus for encoding and decoding a multi-channel audio signal. The claims are allowed because the prior arts of record do not teach the unique arrangement of the encoder and the corresponding

decoder, particularly where the first encoded signal generated from first and second signal components is re-encoded with another signal component generating a second encoded signal and a second set of encoding parameter as recited in the claims.

Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
